Software Engineer (Frontend / Full Stack) | React, Next.js, TypeScript, React Native, Node.js

SUMMARY

Software Engineer with 3 years building production web and mobile applications across frontend, backend, and cloud infrastructure. Shipped end-to-end platforms at Sumeru (Next.js, TypeScript, NestJS, AWS) and founded Aviary, a paid budgeting product live on Google Play and the web, built solo with Next.js 15, React Native (Expo), MongoDB, and Gemini. Strong in UI engineering, REST API design, CI/CD, automated testing, and AI-assisted development with Claude Code and Codex.

SKILLS

Frontend: React.js, Next.js (App Router, SSR, ISR), TypeScript, JavaScript (ES6+), React Native, Expo, HTML5, CSS3, Tailwind CSS, shadcn/ui, Material UI, Framer Motion, GSAP, Redux, Jotai, TanStack Query

Backend & APIs: Node.js, NestJS, REST APIs, tRPC, Prisma, MongoDB, MySQL, Redis, RabbitMQ, Firebase, WorkOS, OAuth 2.0 / PKCE, Webhooks, Cron jobs

Cloud & DevOps: AWS (ECS, ECR, S3, Amplify, Amazon MQ), Vercel, Docker, GitHub Actions, CI/CD, EAS Build, Microservices, Git, Postman, Swagger

Testing & Quality: Vitest, Jest, React Testing Library, Unit and Integration Testing, ESLint, Web Performance (Lighthouse, Core Web Vitals), Accessibility (WCAG), Responsive Design

AI & Payments: Vercel AI SDK, Google Gemini, Claude Code, Codex, OpenCode, Razorpay, PayPal, RevenueCat, Google Play Billing

EXPERIENCE

Sumeru | Frontend Developer — Jun 2025 - Present
Bengaluru, India

- Built and launched the complete consumer web platform (Next.js, TypeScript, Tailwind CSS, tRPC, NestJS, MySQL), delivering booking flow, consultation dashboard, and payment integrations with full ownership of frontend-backend integration.
- Led 90% of admin panel development (Next.js, Refine, Material UI), building the availability-calendar and slot-management system used daily by 30-40 consultants, the core monetization flow of the product.
- Owned backend infrastructure across 3 codebases: designed NestJS/Prisma REST APIs, built RabbitMQ/Amazon MQ microservices, and managed AWS (ECS, ECR, S3, Amplify) with CI/CD pipelines; shipped mobile features in React Native.

Metaverse Ventures Private Limited | Full Stack Engineer Intern — Nov 2023 - May 2025
Remote

- Built xMail, an AI-powered email campaign platform with dynamic variable templating, lead management, and LLM-assisted email generation; optimized backend processing pipelines so bulk personalized sends ran without long-running bottlenecks.
- Developed real-time collaborative editing across xColab and xWord using Yjs CRDTs, enabling multi-user simultaneous document editing with conflict-free synchronization.
- Integrated Solana wallet authentication across 3-4 Web3 products, implementing wallet-based sign-in and transaction signing flows.

PROJECTS

Aviary | Founder and Sole Engineer | AI-powered budgeting app, live on Google Play and web — Mar 2026 - Present
(useaviary.com | web repo | mobile repo)

- Designed, built, and launched a paid subscription product (30-day trial) solo across web, API, and Android with Next.js 15 App Router, React 19, TypeScript, MongoDB, and React Native (Expo SDK 57); 3,300+ commits across two open-source (AGPL) repos.
- Built AI features with Vercel AI SDK and Google Gemini: natural-language expense parsing ("Ask Aviary"), receipt and screenshot scanning, bank-statement import (CSV, Excel, PDF), habit-learning nudges, and a streamed, rate-limited chat API.
- Engineered the React Native app with offline-first logging and sync, Android home-screen widgets, push notifications, PKCE Google sign-in, and RevenueCat / Google Play Billing; released through EAS Build.
- Implemented AES-256-GCM field-level encryption, WorkOS AuthKit authentication with session revocation, Razorpay and PayPal billing webhooks, shared budgets for up to 6 members, and 30+ Vercel cron jobs for notifications, billing, and emails.
- Maintained 670+ automated test files (Vitest, Jest, React Testing Library, in-memory MongoDB) with GitHub Actions CI running typecheck, lint, and tests on every push; instrumented product analytics with PostHog.

Spitha Diamonds | Jewelry eCommerce platform (website) — Jun 2024 - Nov 2024

- Built a full-stack eCommerce platform with Next.js SSR: product catalog, cart, Razorpay payments, and appointment booking with owner approval and automated email notifications; improved load time 25% and Lighthouse SEO score by 30+ points.

Claspr | AI-powered classroom productivity tool (website | github) — Jan 2024 - Jun 2024

- Built a solo full-stack classroom platform with a context-aware AI assistant, AI-assisted assignment creation, in-app review workflow, Notion-style notes, and drag-and-drop folder organization with cross-classroom reordering.

EDUCATION

Christ University, Bengaluru | Bachelor of Computer Applications (BCA) | CGPA 3.35 / 4 — 2022 - 2025

Sri Sri Academy, Kolkata | ISC 92.25% | ICSE 95.8% — 2011 - 2022
