Summary

Software engineer with 3 years building production systems across frontend, backend, and infra. Shipped complete platforms end-to-end at Sumeru, from Next.js frontend to NestJS microservices on AWS. Actively use AI agent orchestration, running parallel agentic workstreams with Claude Code, Codex and OpenCode.

Education

Bachelor of Computer Application (BCA)

2022 - 2025

Christ University, Bengaluru | CGPA: 3.35 out of 4

Sri Sri Academy, Kolkata

2011 - 2022

92.25% in ISC | 95.8% in ICSE

Skills

Frontend: React.js, Next.js (SSR/ISR), TypeScript, JavaScript (ES6+), React Native, HTML5, CSS3, Tailwind CSS, Material UI, Framer Motion, GSAP, Redux, Jotai, Webpack, Three.js, Web Components

UI & Design Systems: Responsive Design, WCAG Compliance, Cross-browser Testing, Design Fidelity, Accessibility, Animation, Component Libraries (MUI, Shadcn)

Backend & APIs: Node.js, NestJS, RabbitMQ, REST APIs, tRPC, Prisma, Firebase, Redis, MongoDB

Tools & Platforms: Git, AWS, Microservices, Postman, Swagger, Clerk, Vercel, Netlify, CI/CD, Docker

AI & Tooling: Claude Code, Codex, OpenCode, OpenClaw, Antigravity

Experience

Frontend Developer

June 2025 - Present

Sumeru | Bengaluru, India

- Built and launched the complete consumer web platform (Next.js, Tailwind, tRPC, NestJS, MySQL), delivering core modules including booking flow, consultation dashboard, and payment integrations, with full ownership of all frontend-backend integrations.
- Led 90% of admin panel development (Next.js, Refine, MUI), building an availability-calendar and slot management system used by 30–40 consultants, the core monetization flow of the product.
- Owned backend infrastructure across 3 codebases, designing NestJS/Prisma APIs, building RabbitMQ/Amazon MQ microservices, and managing AWS infrastructure (ECS, ECR, S3, Amplify) including CI/CD pipelines and mobile feature development on React Native.

Full Stack Engineer Intern

Nov 2023 - May 2025

Metaverse Ventures Private Limited | Remote

- Built an AI-powered email campaign platform (xMail) with dynamic variable templating, lead management, and LLM-assisted email generation, optimizing backend processing pipelines to handle bulk personalized sends without long-running bottlenecks.
- Developed real-time collaborative editing across xColab and xWord using YJS, enabling multi-user simultaneous document editing with conflict-free synchronization.
- Integrated Solana wallet authentication across 3–4 Web3 products, implementing wallet-based sign-in and transaction signing flows for seamless onboarding.

Projects

Spitha Diamonds ([website](#)) - Jewelry eCommerce platform

June 2024 - Nov 2024

- Built a full-stack jewelry eCommerce platform with SSR/Edge Functions — product catalog, cart, Razorpay payments, appointment booking with owner approval and automated email notifications, improving load times by 25% and Lighthouse SEO score by 30+ points.

Claspr ([website](#) | [github](#)) - AI-powered classroom productivity tool

Jan 2024 - June 2024

- Built a solo full-stack classroom platform with a context-aware AI assistant, AI-assisted assignment creation, in-app review workflow, and a Notion-style notes module.
- Solved Google Classroom's core UX problem with drag-and-drop folder organization, emoji tagging, and cross-classroom reordering.
